Dear Director General

Alleged Breach of Directive 2000/60/EC The Water Framework Directive

I enclose a complaint against the Welsh Government, as we believe that they have failed in a number of areas allowing deterioration of water quality over a substantial area of the country. It is with considerable sadness that we do this as the government has produced several enactments that should support the environment but it appears that they have forgotten about protecting our rivers, fisheries and the economy they support.

Afonydd Cymru is a registered charity representing six regional rivers trusts who work to restore and improve our rivers and freshwater ecosystems using EU funding.

I would be grateful if you would acknowledge safe receipt via the email address below.

Yours sincerely

Dr Stephen Marsh-Smith OBE Chief Executive Afonydd Cymru, the Rivers Trusts of Wales

Fighting for Wales' rivers
